**Subject:** RE: Daily updates to Incident Commanders

**[NUS Restricted]**

7 Feb 2020

1. DORSCON Level has been raised to Orange. I have attached the press release by MOH for your reference. The following are the enhanced measures to be implemented in NUS with effect from Monday, 10 Feb 2020.
2. Daily Temperature taking
  - a. All staff and students will be required to take their temperature twice daily (preferably before and after lunch) and reported via the temperature declaration website <https://myaces.nus.edu.sg/htd/>.
3. Temperature Screening Stations
  - a. 18 temperature screening stations will be set up across NUS campuses. There will be 12 stations in KR Campus, two in UTown, two in Bukit Timah Campus and two in Outram Campus. CEM will be sending out instructions on the setting up and operation of these temperature screening stations to the relevant units.
  - b. All staff, students and visitors to NUS buildings and offices will need to undergo temperature screening. If their temperature is below the threshold (38oC), they will be given a coloured sticker. The colour of the sticker will change every day as decided by CEM. The colour of the day will be posted on the emergency.nus.edu.sg website.
  - c. Only persons with the correct coloured sticker will be allowed to participate in the activity or enter the office.
4. Classes & Events
  - a. All events and activities on NUS campuses involving more than 50 participants are to be cancelled or postponed.
  - b. E-learning will be implemented for classes with more than 50 students. Classes with less than 50 students can carry on as usual.

Thank you.
